CLEVRER Video Annotations

This document describes short physics videos from the CLEVRER benchmark. Each video is 128 frames (frame 0 to frame 127, about 5 seconds) showing solid objects sliding on a flat floor and colliding.

Every video has its own chapter titled 'Video <number>'. Questions refer to a video by that number.

Each chapter has three sections. 'Objects' lists every object with its color, material (metal or rubber) and shape (cube, sphere or cylinder). 'Events' lists, in time order, when objects enter the scene, exit the scene and collide with each other. 'Motion log' gives sampled positions (x, y) and velocities (vx, vy) on the floor plane for objects that are visible in the video.

An object is stationary at a frame if its speed is below 0.1; otherwise it is moving. Only what is visible during the 128 frames is recorded; nothing after the video ends is described.
